TRIZ Prism Worksheet

2) GENERAL

1) SPECIFIC PROBLEM

TRIZ PRISM

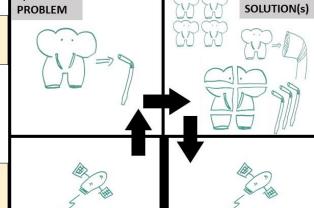

3) GENERAL

4) SPECIFIC

SOLUTION

This large object does not fit through this small aperture.

This satellite image file is too large to send to a special operations soldier in Afghanistan using the very limited bandwidth available.

Use **smaller versions** of object. Use <mark>larger apertures</mark>. Divide large object into pieces. Use **multiple apertures**.

Allow soldier to request **small** image chips of specific areas rather than entire satellite image.
